Professional Summary

Backend-focused .NET Developer with 2+ years of experience building **high-availability, multi-tenant SaaS platforms** using ASP.NET Core, EF Core, and Azure. Skilled in designing scalable REST APIs, optimizing database performance (30% faster queries), implementing secure JWT/OAuth authentication, and maintaining production systems for 500+ active users. Strong in async programming, clean architecture, CI/CD automation, caching strategies, background processing, and observability. Seeking backend/product engineering roles in India (12–15 LPA+).

Experience

Software Developer

Jan 2024 – Present

In Time Tec, Jaipur

Tech Stack: ASP.NET Core, EF Core, SQL Server, Azure, Docker, Hangfire

- Owned backend services for **multi-tenant transportation & feedlot management platforms**, serving 500+ active users with high reliability.
- Designed and implemented **15+ REST APIs** with **JWT authentication**, role-based access control, pagination, filtering, and structured error handling.
- Optimized **SQL queries, indexing, and EF Core execution plans**, improving response times by 30% under production load.
- Built **background job pipelines** using Hangfire for retries, notifications, and scheduled workflows while maintaining tenant isolation.
- Implemented **unit and integration tests** using xUnit/NUnit, covering core backend workflows for reliability.
- Exposed to **microservices concepts, API versioning, and inter-service communication patterns** in modular monolith architecture.
- Handled **async workflows and concurrency challenges**, ensuring safe background job execution and non-blocking API responses.
- Integrated **structured logging (Serilog)** and monitoring (**Azure Application Insights**) for proactive issue detection and resolution.
- Implemented caching strategies with awareness of **distributed caching** to reduce repetitive database load.
- Followed **Clean Architecture and SOLID principles**, contributing to modular and maintainable backend services.
- Managed **Dockerized deployments** and CI/CD pipelines for automated testing and controlled production releases.

Selected Projects

FeedlotManager – Agricultural SaaS Platform

ASP.NET Core, EF Core, PostgreSQL, Azure

- Architected **multi-tenant backend** with database-per-tenant isolation and zero-touch tenant provisioning using Azure Functions.
- Developed **versioned domain models** (v1 → v2) to maintain backward compatibility while supporting advanced ration scheduling.
- Implemented **polymorphic strategy patterns** for lifecycle reconciliation (mortalities, moves, receipts) to ensure data integrity.
- Enabled proactive **production monitoring** with Azure metric alerts, improving reliability in low-connectivity environments.
- Gained exposure to **event-driven architecture patterns** using background jobs and async triggers.

Roll On Dispatch – Logistics Platform

ASP.NET Core, SQL Server, React Native

- Designed backend APIs handling **1000+ shipments/month** with offline synchronization and transactional consistency.
- Implemented secure **authentication & hybrid authorization**.
- Standardized CRUD operations using a **generic controller-service-repository hierarchy**, reducing boilerplate by 40%.
- Contributed to **CI/CD automation** with Azure DevOps pipelines, including staging/production deployment validation.

Technical Skills

- Languages:** C#, SQL, JavaScript
- Backend:** ASP.NET Core, Web API, EF Core, LINQ, Async/Await, Hangfire
- Database:** PostgreSQL, SQL Server, Query Optimization, Indexing, Stored Procedures
- Architecture:** Clean Architecture, SOLID, Dependency Injection, Modular Monolith
- Security:** JWT, OAuth, Role-Based Authorization
- Testing:** xUnit, NUnit, Unit & Integration Testing, Test-Driven Exposure
- Microservices:** Modular Monolith, API Versioning, Inter-Service Communication Concepts
- Caching & Concurrency:** Redis, Cache Invalidation Patterns, Async/Await Patterns, Background Job Scaling
- Observability & Eventing:** Serilog, Azure Application Insights, Event-driven Architecture Exposure

Education

B.Tech, Computer Science

Rajasthan Technical University, Jaipur

2020 – 2024

CGPA: 9.6/10
