Professional Summary

Frontend-focused engineer with 2+ years of experience building production-grade **React 18 & TypeScript** web applications and **cross-platform React Native** mobile apps. Contributed to multi-tenant SaaS platforms, reusable component libraries, and high-performance dashboards. Skilled in **state management, API integration, responsive design, lazy-loading, testing, and CI/CD pipelines**. Minor backend experience in **.NET Core and REST APIs** to support frontend features. Collaborates with engineers, QA, and designers to deliver scalable, maintainable, and high-quality user interfaces.

Experience

Frontend Engineer — Feedlot Manager Platform

Remote

React 18, TypeScript, Redux Toolkit, RTK Query, AG Grid, Vite, Azure DevOps

2024 – Present

- Contributed to a multi-app SPA, collaborating with a team of 5 engineers and QA to deliver domain-isolated modules and a shared component library.
- Implemented 70+ RTK Query slices for type-safe API integration, reducing manual API work by 80%.
- Built reusable hooks and components (`useDecimalInput`, `useLocalization`, AG Grid wrappers) used across dashboards and forms.
- Optimized rendering using React memoization, lazy-loading, and virtualization for large data tables.
- Implemented responsive, accessible UI with i18n support (English/Spanish).
- Participated in code reviews and mentoring juniors, establishing best practices for state management and API caching.

Frontend Engineer — Roll On Dispatch Web Platform

Remote

React 18, TypeScript, Redux Toolkit, RTK Query, Google Maps API

2024 – Present

- Developed core features for a logistics dispatch app including shipment builder, load board, and driver management.
- Integrated Google Maps real-time route visualization and PDF/Excel/CSV export functionality.
- Implemented Multi-Carrier Shipping module with Redux Toolkit `createAsyncThunk`, API integration, and paginated views.
- Contributed to CI/CD pipeline with automated linting, unit testing (Vitest, React Testing Library), and staging/production deployments.

Mobile Engineer — Roll On Dispatch Driver App

Remote

React Native 0.74/0.75, TypeScript, React Navigation, PostHog, Firebase, APNS

2024 – Present

- Built cross-platform driver app screens with real-time GPS tracking, push notifications, and offline sync.
- Integrated PostHog session replay and analytics hooks to track interactions and performance.
- Implemented native device features: document scanning, image compression, secure token storage, geolocation-aware timezone detection.
- Collaborated with mobile and backend engineers to deliver context-driven state management and clean architecture.

Mobile Engineer — Feedlot Manager Mobile App

Remote

React Native, Redux Toolkit, React Native Paper, TypeScript

2024 – Present

- Developed iPad-optimized mobile app with top-tab navigation, form entry UI, and reusable components.

Technical Skills

- **Frontend:** React 18, React Native, TypeScript 5.x, Vite, Redux Toolkit, RTK Query, AG Grid, Chart.js, FullCalendar, react-beautiful-dnd, React Router v6, i18next, Storybook, React Testing Library
- **Mobile:** React Navigation (Stack/Drawer/Tabs), PostHog, Firebase Cloud Messaging, APNS, Keychain, Geolocation, Document Scanner, Image Compression, Reanimated
- **Testing & Quality:** Vitest, Jest, React Testing Library, ESLint, Prettier, Husky, lint-staged, CI lint-ratcheting, Cypress (E2E)
- **DevOps & Tooling:** Azure DevOps Pipelines, Azure Static Web Apps, pnpm, Swagger codegen, Auth0, Git, CI/CD pipelines
- **Backend (supporting):** .NET 8, C#, Entity Framework Core, JWT/Auth0, REST APIs, Azure SQL

Education

Bachelor of Technology

Computer Science & Engineering

2020 – 2024

Rajasthan Technical University, Jaipur
