Professional Summary

Software Engineer with 2+ years of experience building production **React Native** mobile applications and **React + TypeScript** web platforms. Developed mobile systems for logistics and transportation platforms used by **500+ drivers**, including **real-time GPS tracking, push notifications, and offline workflows**. Experienced in **API integrations, scalable state management, and cross-platform mobile architecture**. Comfortable collaborating with backend teams and integrating **REST APIs, authentication, and cloud services**.

Experience

Mobile Engineer — Roll On Dispatch Driver App

Remote

React Native 0.74/0.75, TypeScript, React Navigation, Firebase, APNS

2024 – Present

- Built cross-platform **React Native driver application used by 500+ drivers**, enabling real-time GPS tracking, job workflows, and push notifications.
- Integrated **Firebase Cloud Messaging and APNS** for real-time operational notifications.
- Implemented **offline data synchronization and caching** to support unreliable network conditions during field operations.
- Integrated native mobile capabilities including **document scanning, image compression, secure token storage, and geolocation services**.
- Collaborated with backend engineers to integrate **REST APIs, authentication flows, and real-time operational data**.

Mobile Engineer — Feedlot Manager Mobile App

Remote

React Native, Redux Toolkit, React Native Paper, TypeScript

2024 – Present

- Developed **iPad-optimized React Native application** with top-tab navigation, form workflows, and reusable UI components.
- Implemented **Redux Toolkit state management** to manage complex mobile form states and API interactions.
- Collaborated with backend teams to integrate domain APIs and deliver consistent mobile workflows.

Frontend Engineer — Feedlot Manager Platform

Remote

React 18, TypeScript, Redux Toolkit, RTK Query, AG Grid

2024 – Present

- Contributed to a **multi-tenant SaaS platform** delivering modular dashboards and domain-isolated features.
- Implemented **70+ RTK Query endpoints** for type-safe API integration, reducing manual API work by 80%.
- Optimized UI performance using **memoization, lazy loading, and virtualization** for large datasets.
- Built reusable hooks and component abstractions used across multiple dashboards and forms.

Frontend Engineer — Roll On Dispatch Web Platform

Remote

React 18, TypeScript, Redux Toolkit, Google Maps API

2024 – Present

- Developed logistics dispatch features including **shipment builder, driver management, and load board dashboards**.
- Integrated **Google Maps route visualization** and location-based operational workflows.
- Implemented export pipelines for **PDF, Excel, and CSV reporting**.
- Contributed to CI/CD pipelines with automated testing and production deployments.

Technical Skills

- **Mobile Development:** React Native, TypeScript, React Navigation, Geolocation, Push Notifications, Offline Sync
- **Frontend:** React 18, Redux Toolkit, RTK Query, Vite, AG Grid, React Router
- **Mobile Integrations:** Firebase Cloud Messaging, APNS, Keychain, Document Scanner, Image Compression
- **Testing:** Jest, Vitest, React Testing Library, Cypress
- **DevOps:** Azure DevOps Pipelines, CI/CD, Git
- **Backend (Working Knowledge):** .NET 8, C#, Entity Framework Core, REST APIs, JWT/Auth0, Azure SQL

Education

Bachelor of Technology

2020 – 2024

Computer Science & Engineering

Rajasthan Technical University, Jaipur
