PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years of experience building production React Native mobile applications and React + TypeScript web platforms. Strong in cross-platform mobile architecture, scalable frontend state management, API integrations, real-time GPS workflows, push notifications, offline sync, dashboards, and reusable UI systems. Experienced in logistics and SaaS products used by 500+ users, with practical backend exposure in .NET APIs, authentication, SQL, and Azure DevOps.

TECHNICAL SKILLS

Mobile: React Native, TypeScript, React Navigation, Redux Toolkit, Firebase Cloud Messaging, APNS, Keychain, Geolocation, Offline Sync, Document Scanner, Image Compression, Reanimated

Frontend: React 18, TypeScript, Redux Toolkit, RTK Query, Vite, React Router, AG Grid, Chart.js, FullCalendar, i18next, Storybook, Responsive UI

API / Data: REST APIs, Swagger/OpenAPI, Authentication Flows, API Caching, Pagination, Filtering, Error Handling

Testing / Quality: Jest, Vitest, React Testing Library, Cypress, ESLint, Prettier, Husky, lint-staged

DevOps / Tools: Azure DevOps Pipelines, Azure Static Web Apps, Git, npm, CI/CD, PostHog

Additional Exposure: Node.js, Express.js basics, Angular fundamentals, Vue.js fundamentals, TanStack Query, .NET 8, EF Core, Azure SQL

EXPERIENCE

Software Developer – Mobile and Frontend

Jan 2024 – Present

In Time Tec

Jaipur, India / Remote Client Projects

- Built production React Native and React + TypeScript applications for logistics and agricultural SaaS platforms across mobile, tablet, and web interfaces.
- Collaborated with backend engineers, QA, and product stakeholders to deliver API-driven workflows, reusable UI components, and production-ready releases.

Roll On Dispatch Driver App

React Native, TypeScript, React Navigation, Firebase, APNS

- Developed cross-platform driver application used by 500+ drivers for job workflows, real-time GPS tracking, push notifications, and field operations.
- Integrated Firebase Cloud Messaging and APNS for real-time operational notifications across Android and iOS.
- Implemented offline data synchronization and caching to support unreliable network conditions during transportation workflows.
- Integrated native mobile features including document scanning, image compression, secure token storage, geolocation, and timezone detection.
- Added PostHog analytics and session replay hooks to track user interactions, performance issues, and mobile behavior.

Feedlot Manager Mobile App

React Native, Redux Toolkit, React Native Paper, TypeScript

- Developed iPad-optimized React Native application with top-tab navigation, form workflows, and reusable mobile UI components.
- Implemented Redux Toolkit state management for complex form states, API interactions, and predictable mobile data flow.
- Built reusable screens and form patterns to improve consistency across mobile feedlot workflows.

Feedlot Manager Web Platform

React 18, TypeScript, Redux Toolkit, RTK Query, AG Grid, Vite

- Contributed to a multi-tenant SaaS web platform with modular dashboards, domain-isolated features, and a shared component library.
- Implemented 70+ RTK Query endpoints for type-safe API integration, caching, and automated re-fetching, reducing manual API work by 80%.
- Built reusable hooks and components including decimal input handling, localization helpers, and AG Grid wrappers used across dashboards and forms.
- Optimized rendering performance using memoization, lazy loading, and virtualization for large datasets and complex dashboards.
- Implemented responsive and localization-ready UI with English/Spanish support.

Roll On Dispatch Web Platform

React 18, TypeScript, Redux Toolkit, RTK Query, Google Maps API

- Developed logistics dispatch features including shipment builder, load board dashboards, driver management, and carrier workflows.
- Integrated Google Maps route visualization and location-based operational workflows.
- Implemented PDF, Excel, and CSV export flows for operational reporting.
- Contributed to CI/CD pipelines with automated linting, testing, and staging/production deployments.

EDUCATION

Bachelor of Technology, Computer Science and Engineering

Rajasthan Technical University, Jaipur

2020 – 2024

CGPA: 9.6/10
