## Objective

Full-stack developer with **2+ years of experience** building and maintaining production-grade **React Native mobile applications** and **ASP.NET Core Web APIs**. Strong in clean architecture, scalable API design, secure authentication, and CI/CD pipelines. Focused on delivering reliable, high-impact solutions in fast-paced product environments.

## Work Experience

### Software Developer

Jan 2024 – Present

*In Time Tec, Jaipur*

**Tech:** React Native, Redux, ASP.NET Core Web API, EF Core, SQL Server, Azure, Docker, Git

- Contributed to a production transportation mobile application used by **500+ active drivers** across Android and iOS.
- Designed and implemented **15+ RESTful APIs** using ASP.NET Core Web API with JWT-based authentication and role-based authorization.
- Improved geofencing logic and background sync, reducing missed delivery events by **20%**.
- Built a native document scanning module with image compression, reducing upload size by **40%** and improving sync reliability.
- Implemented secure credential storage using **iOS Keychain** and **Android Keystore**.
- Developed background jobs using **Hangfire** for notifications, trip sync, and retry workflows.
- Optimized EF Core queries and database indexing, improving API response times by **30%**.
- Integrated Twilio for automated SMS alerts and implemented structured logging using **Serilog** and **Azure Application Insights**.
- Set up CI/CD pipelines for Android (Play Store) and iOS (TestFlight) with automated builds and versioning.

## Projects

### Roll On Dispatch

*React Native, ASP.NET Core Web API, SQL Server, Redux*

- Built a unified mobile platform for drivers and dispatchers handling **1k+ shipments per month**.
- Implemented role-based navigation, offline-first data sync, and secure JWT authentication flow.
- Designed reusable UI components and Redux-based state management, reducing feature development time by **25%**.

### NewsSync – News Fetcher API

*.NET 9, EF Core, Azure*

- Developed a scalable backend API for fetching and categorizing news from multiple sources.
- Implemented Clean Architecture with clear separation of Domain, Application, and Infrastructure layers.
- Added logging, monitoring, and diagnostics using Serilog and Azure Application Insights.

## Technical Skills

- **Languages:** C#, JavaScript, TypeScript, SQL
- **Mobile:** React Native, Redux, React Navigation, Native Modules
- **Backend:** ASP.NET Core Web API, EF Core, REST, JWT, Async/Await
- **Cloud/DevOps:** Azure App Services, CI/CD, Docker,
- App Center
- **Tools:** Git, Postman, Swagger, VS Code, Xcode, Android Studio
- **Architecture:** Clean Architecture, SOLID, Dependency Injection

## Education

### B.Tech, Computer Science

2020 – 2024

Rajasthan Technical University, Jaipur

CGPA: 9.60 / 10

**Relevant Coursework:** Data Structures and Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming, Software Engineering
